# CZAR AND KAISER READY FOR DEATH **GRAPPLE IN EAST**

Crucial Battle Impends as German Columns and Reinvigorated Austrians Push Russians Back on Their Own Soil.

LONDON, Oct. 14. All eyes today are turned to the eastward, where, under conditions of the utmost secrecy, the Teutonic allies and the Russians are preparing to engage in what may prove one of the most decisive combats of the war.

Evidence is accumulating to show that this gigantic conflict will be determined in Russian Poland, and the only question disturbing the British experts is as to which side has chosen the battle ground.

Berlin admits having withdrawn from the Niemen River, and at the same time. discounts the whole movement in that region as being of no strategic im-

It is now clear that Russia has abandoned the narrow point in Galicia be-tween Frzemysl and Cracow, Russian forces having virtually occupied all of Galicia with the exception of these two places. Petrograd claims this operation is due to strategic reasons, while Vienna maintains that rejuvenated Austrian armies have relieved the Przemysl fortress and driven the invaders out. It is propertioned that the more or less demoralized Austrian forces, stiffened by German reinforcements, have resumed the offensive, but there is no information here to indicate that the Russian retirement is anything in the nature of a rout

ment is anything in the nature of a rout resulting from vigorous fighting.

Whatever may be the intention of the grantes operating on the ends of the great Russian battle front, it is clear that these movements have paled into Insignificance beside the tremendous forward advance in the centre. Broadly speaking. this is now the position of the antag-enists awaiting the word to open the engagement. The main German armies in Russlan Peland are moving toward the Vistula River on a north and south front

berg. To the left of this army, between Lodz and Kallsz, is another German force, and on the right of the main German army is an Austrian force.

The bulk of the Russian troops are on the east bank of the Vistula, but a portion of their forces are still on the west side of the river. The nature of the country makes it are the country makes it are the country makes its probable that of the country makes it probable that the centre of the battle line will be the centre of the battle line will be between Sandomiers and Ivangorod, both on the Vistula River, and about 60 miles

apart.

In order to take up these positions the Garmans have been compelled to abandon strong positions along the River Warthe and avail themselves of the transportation facilities of Russian rallroads, which are incomparably poorer than what they have been accustomed to. The Russians are described as not to engage the enemy in a country of their own choosing and near the base of

The Germans are still retiring in the direction of East Prussia, and in Petro-grad there is a report of a Russian victory near Racski, midway between Augustowo and Suwalki, which resulted in the capture of several German bat-tories sent from Koenigsberg.

Berlin declares that all of the western part of Russian Poland is now in the possession of Germany, and that every possession of Germany, and that every place west of the Vistula, with the ex-ception of Warsaw, is in their hands. It would appear to be a fact that no heavy engagements yet have been fought

in this region, most of the fighting being between ecreens of cavalry. Should the Austro-German forces suffer defeat along the battle front now forming, the way would be opened, it is being argued in London, for the invasion of Silesia, which, next to the Rhine provinces, is the richest district of Germany. But it is not expected, even in the event of their victory, that the Russinns will advance with any great speed The topography of the country and the lack of transports precludes the possibility of anything like the German aween through Belglum.

William Harrigan Accused of Retaining Fees for His Own Use.

TRENTON, Oct. 14 .- An order for the prosecution of ex-Sheriff William Harrigan and his bondsmen, of Essex County, on the ground that the former had collected certain fees while he was holding office and which he is said to have retained for his own use, was made to-

day by Governor Fielder. In the opinion of the Executive, there is much doubt as to whether his intervention is necessary to have the action started, as well as to the legal liability of the former official's sureties and the merits of the claim. The Governor said that he was unwilling by withhelding his sanction to the sult to put any ob-
